Baby Cove

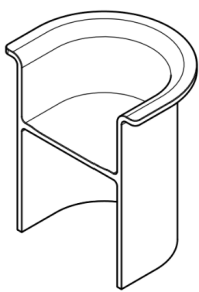

Baby Cove c/o Thomas Coward

The Baby Cove chair is designed for children with the same intention to highlight the purity and strength of terracotta.

Two negative shapes are placed on top of each other, one creating lift, the other creating support. The Cove chair evokes the coastal formation that its name derives from; it exists by the absence of matter.

Cove
450 x 335 x 660H
* Max height of seat 420mm,
