Description

\varnothing 42 cm freestanding washbasin made of natural or dark fireclay, without faucet hole and with open drain. Available in two external finishes: natural earth or dark earth. The following enameled interiors are available: transparent (both for the natural and dark earth versions), cream white (only for the natural earth version) and blue (only for the dark earth version). The enameled finish is always polished. The pedestal, designed for floor drainage, always has the same external finish as the sink and requires to be fixed to the floor. For this version the waste trap .MET0475 has to be used.

Note

The washbasin is entirely handmade, therefore any differences found on the surface or between various items should not be considered imperfections but rather, a sign of quality.
